

**Remarks/Arguments:**

The above Amendments and these Remarks are in reply to the Office Action mailed August 6, 2008.

Claims 1, 3-9, 19 and 21-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Misra et al., (U.S. Patent 6,189,146) in view of Singh et al., (U.S. Patent 6,816,842) and in further view of Fenson et al. (U.S. Publication No.: 2002/0065681) and in further view of Coley et al. (U.S. Patent 5,790,664).

Claims 1, 19 and 28 have been amended to add the feature “the created fields are fields whose meaning is defined by the administrator”. This added feature further distinguishes the cited prior art.

This new feature is supported by paragraph [0025] of the present invention’s specification.

The system shown in Figure 31 of Fenson allows an administrator to relabel existing fields, but not to define new fields.

For the above reason, the claims are now believed to be allowable.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: September 5, 2008
